A NEW WAY
OF LIFE
IS JUST A
TOUCH AWAY.

A close-up photograph of a hand touching a dark, reflective surface. The point of contact is highlighted by three concentric, glowing white circles, suggesting a digital touch interface. The background is a soft, out-of-focus gradient of light and dark tones.

The world is shrinking to your palm. So, shouldn't it be a case, when you lie idle in the comforts of your own home? As a company that fulfills your curiosity, we've pushed the boundaries of innovation to add newer experiences to your life. Smart Digital series by Roma is a step towards it.

It's clearly the evolution of a switch. And you are the first to experience it. From a simple switch-on-switch-off operation to feather touch, from lights that dispel darkness in your lives to mood setting, from bold tastes to slim, sleek aspirations, we have raised the expectations. Plus, the series is packed with modern day comforts like remote and Wi-Fi based operation. Because, we know, you like to stay in control of things, no matter where you are.

Come, touch tomorrow.

F E A T H E R T O U C H P A N E L . T H E N E W F L A U N T .

The Smart Digital series by Roma is designed so brilliantly that it will change the way humankind looks at switches. It comes with a Feather Touch Panel that combines art with smart to deliver an unmatched experience. And it responds so smoothly, the whole experience will touch you.

SLIM, SLEEK DESIGN.
IT'S ALL ABOUT SUBTLETY.

Today, style speaks a whole new language. Statements are made subtly, not boldly. Inspired by this thought, the Smart Digital series by Roma is designed with a 3mm sleek toughened glass. So, function-wise it's strong. And form-wise, it's sensational.

RETROFIT FRAME.
CHANGE IS THE ONLY CONSTANT.

Lifestyles change. And man constantly strives to live up to it. But that doesn't mean a switch should change a wall you designed with so much attention and detail. So, here's a smart alternative – the Smart Digital series by Roma. Its Retrofit Frame lets you install a new style in existing Anchor Metal Box, with ease.

SURGE PROTECTION.
PEACE OF MIND IS A BRILLIANT EXPERIENCE.

Innovation is a thoughtful thing. As luxury, safety is also an important aspect of it. That's why the Smart Digital series by Roma is built with a Surge Protection feature that provides ultimate safety from voltage fluctuation. That means 100% peace of mind, 0% worries.

TAKE CONTROL, TAKE CHARGE.
THE WAY YOU PLEASE.

You are used to a particular way of life, where things literally move to your command. And we didn't want to change that. That's why the Smart Digital series by Roma is designed in a way that you stay in control of things.

Touch based control

Mobile App based control

Remote based control

Voice based control

SCENARIO SETTING. NECESSITY IS THE ULTIMATE LUXURY.

Most luxuries are born out of necessity. And one such luxury is the Scenario Setting feature in the Smart Digital series by Roma. From multiple combinations to a single variant, this feature allows you to change the whole picture, at the touch of a button.

LIGHT DIMMING.
LET YOUR MOOD CONTROL THE AMBIENCE.

Moods have their own quirk. They change in an instant, often without a notification. Hence, the Light Dimming feature in the Smart Digital series by Roma lets you control the brightness of a room.

CURTAIN CONTROL.
PLAY HIDE AND SEEK
WITH THE SUN.

A unique Curtain Control feature that helps you raise and drop curtains in the house at the touch of a button. That's the Smart Digital series by ROMA for you. That's power.
