ADORN YOUR LIFE WITH  
**RIGHT LIGHT**

LED LIGHTING  
PRICE LIST

**PANASONIC LED**

Illumination that  
inspires the best in you.

Light inspires a wide range of emotions. Enriched by a century of experience and relevance, we have created lights that encompass the epic range of human feelings. Our technical expertise gives us an intuitive edge to understand your needs and make products accordingly. So here we are, with world - class LED products crafted with impeccable technical precision and unmatched style that inspire the best in you.

May this illumination inspire you, today and always.

## SAFETY

### Surge Protection

Panasonic LED's driver has a surge voltage resistance upto 2.5kV, which protects the luminaire against voltage spikes in electric circuits.

### Wide Voltage Range

Wide input voltage range, for LED Bulb: 80-400V, for LED fixtures: 100-300V.

Voltage fluctuations are common in most places in India, so Panasonic LEDs have a wide operating voltage range.

### Fire Resistance

Panasonic LEDs use a Class V2 or greater grade material, which does not catch fire. This ensures that the fire does not spread to the other electrical equipment during short circuits.

## COMFORT

### Low Glare

Glare can lead to discomfort. That's why Panasonic LEDs have a high quality diffuser and smart design for glareless lighting, making them best suited for the home.

Panasonic LED  
with uniform  
distribution

### Uniform Lighting

Panasonic LEDs have a uniform arrangement of LEDs and use a wide diffuser to ensure uniform lighting.

Other brands' LED  
with non-uniform  
distribution

# Safety, Comfort and

# LONG LIFE

## Consistent Light Output

With the UV-Stabilised Polycarbonate Diffuser, light output remains the same for a long time, which also prevents the diffuser from yellowing.

## Better Heat Dissipation

High quality housing and design leads to better heat management and maintains 70% of the initial brightness up to 50,000 burning hours.

Heat is drawn away from the light module towards the heat sink, where it dissipates from the fixture.
