THE BEST IN CLASS WOODEN FLOORING

2 types of floor surface finishing materials to choose from

There are two types of surface finishes that determine the look of the flooring. "Veneer Finish" and "Sheet Finish" with high quality and various colors and patterns.

The beauty of natural wood has been further emphasized.

Adopts aging technique that brings out the stately wood taste.

Taking advantage of the natural taste with clear coating, in addition to the design like parquet, we have a new lineup of craft types that are particular about texture and color.

The beauty of natural wood has been further emphasized.

We have prepared a wide range of expressions and colors in response to interior trends that show a wide variety of freedom. A wide range of facial expressions and colors are available. Like a work of art, we pursue the ideal grain and color until we are satisfied.

"Wood aging technology" that creates Meister's Wood that brings out the original charm of wood.
It is Panasonic's unique technology that delicately controls wood grain, shine, and color.

"Aging technology" makes beauty stand out.

One of the technologies that supports Meister's Wood is The most beautiful shape of natural wood by applying wood heat treatment to make the wood grain stand out and express the color range.
Also, by applying aging, you can keep the most beautiful state of natural wood for a long time.

*"Aging technology" is applied to all veneer-finished products.

Evolution of Meister's Wood.

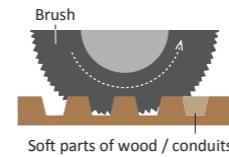

"Brushing" and "Wiping" coloring" make your facial expressions richer.

In order to bring out the grain and texture unique to ash wood, "brushing" is applied with the optimum adjustment to bring out beautiful shadows and texture. In addition, the wood grain drawn by "wood aging treatment" and "wiping coloring" that makes the best use of the texture of "brushing" give a deep nuance color.

*"Brushing" wiping coloring "is applied to Veritis Floor W Craft and VeritisFloor W Direct Adhesion Type 45 Heat ResistantCraft Type.

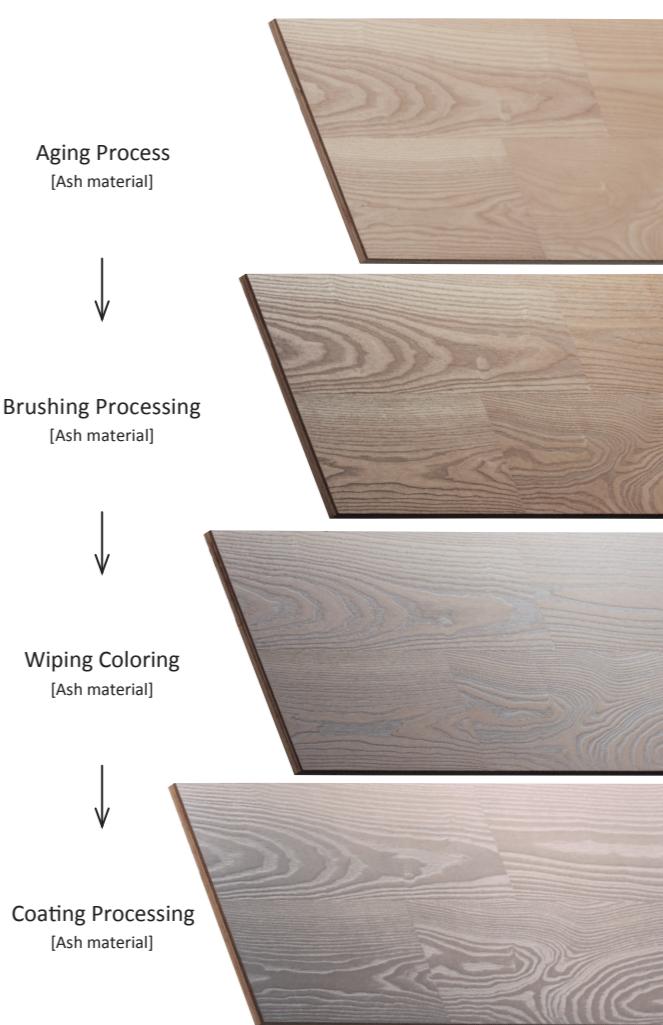

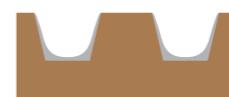

What is brushing (uzukuri) process?

A traditional technique that creates concave and convex parts along the grain of wood. By applying a brush to the surface of the wood, the soft parts of the wood and the conduits are scraped off, creating natural irregularities.

What is wiping coloring

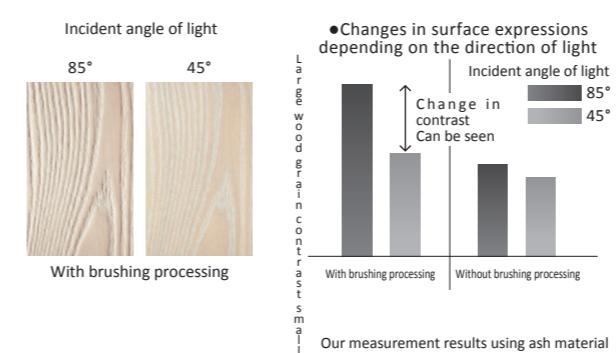

A method of coloring a conduit by rubbing a pigment on the surface of wood and scraping it off. By layering coloring, you can get a sense of depth.

Shadow

Due to the natural unevenness, you can see the change in facial expression depending on the angle of the light.

The shadows along the grain of natural wood make the texture stand out.

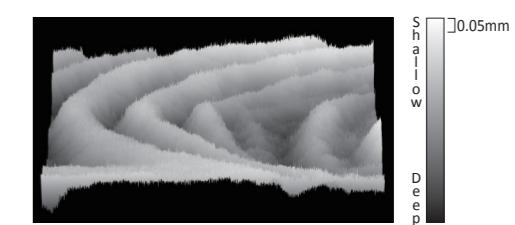

Feet roughness

The uneven texture is not only beautiful to look at, but also feels good for skin.

With brushing and a coating that does not impair unevenness, we pursued a smooth and comfortable feel on bare feet.

● 3D scanned image after coating

W

Veneer Finish

Sophisticated design "Parquet wood texture and nuance color"

Parquet type

Although this is a parquet design with a strong classic image, you can create a free and gorgeous interior with color variations. Perfect for retro-modern interiors and fine, chic interiors.

Clear type

Panasonic veneer values tree species. Uses a matte-finished paint that is colorless and transparent and has a moderate luster. You can enjoy the texture of natural wood and the original expression, color, and texture of each tree species.

Floor V-S

5 designs that can be coordinated with furniture,
We have 7 unique patterns for various interiors.

•

- Walnut pattern (sheet)
- Cherry pattern (sheet)
- Oak pattern (sheet)
- Maple pattern (sheet)
- White oak pattern (sheet)
- Charcoal oak pattern (sheet)
- Aged teak pattern (sheet)
- Indigo oak pattern (sheet)
- Aged chestnut pattern (sheet)
- Calm cherry pattern (sheet)
- Washed oak pattern (sheet)
- Ivory ash pattern (sheet)

Walnut pattern

A classic dark color that suits both modern and Japanese spaces.

Easy to match with any interior. The secret of its unchanging popularity is the gentle and warm cherry pattern.

Cherry pattern

The three-dimensional grain is impressive.
An oak pattern that is also recommended for Japanese-style interiors.

Oak pattern

Maple pattern

White oak pattern

For a crafty finish
that looks like white
paint on oak.

Charcoal oak pattern

With the depth of plant dyeing expresses warm colors.
Recommendation for a Japanese interior that Europe longs for.

Aged teak pattern

Reproduced old teak,
which is even rarer
among teak, which is a
high-grade wood.

The scratches that
have been used
make you feel the style.

Indigo oak pattern

Oak wood dyed with beautiful indigo-dyed blue.
The dignified expression with coolness and warmth is attractive.
A grayish tone and black coordination to give her a world view of Euro lux.

Aged chestnut pattern

For a tone that suppresses saturation and does not overstate. Reproduce the expression of the deep and calm heather that is born by slowly applying heat.

Calm cherry pattern

Bright cherry
By bleaching and suppressing the color, we made it brightly coordinated and in light color.

Washed oak pattern

The wash finish, in which white paint is rubbed into the wood grain, expresses a rustic texture.

Ivory ash pattern

Apply a thin coat of white oil to the flowing wood ash,
Finished in a slightly yellowish and warm shade.

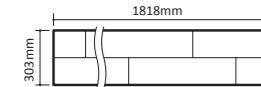

Floor V-W & Floor V-S

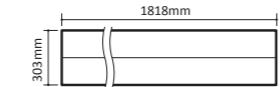

This standard series offers 6 types of veneers and 12 sheet patterns in a wide variety of colors and patterns.

[Product Lineup]

W Veneer Finish

S Sheet Finishing

A wide variety of colors and patterns that can be matched with a wide range of interior styles.

A new grayish shade colour has been added, further widening the range of coordination.
